

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A sound generator for a portable device comprising;

a case;

a sound generating device mounted in the case;

a battery mounted on an outside of the case so as to be exposed;

terminals ~~provides~~ provided on the case;

a pair of leads connecting a pair of electrodes of the battery with the terminals.

2. (Original) The sound generator according to claim 1 wherein the case has a recess on an outside wall thereof, and the sound generating device is mounted in the recess.

a
3. (Original) The sound generator according to claim 1 wherein each of the leads comprises a contact plate contacted with the corresponding electrode.

4. (Original) The sound generator according to claim 1 wherein the sound generating device is a buzzer.

5. (Original) The sound generator according to claim 3 wherein the battery is a disc type battery, and has an upper electrode and lower electrode.

6. (Original) The sound generator according to claim 4 wherein the terminals comprises a pair of terminals for applying a voltage of the battery to a control circuit, and a pair of terminals for

applying a voltage from the control circuit to the buzzer for operating it.

7. (Original) The sound generator according to claim 5 wherein the contact plate contacted with the upper electrode is made of a resilient metal plate.

a 8. (Original) The sound generator according to claim 7 wherein the battery is held by the contact plate engaged with the upper electrode.

9. (Original) The sound generator according to claim 8 wherein the contact plate holding the battery is offset.

10. (Original) The sound generator according to claim 8 wherein each of the terminals comprises a flat metal plate so as to be mounted on a printed circuit substrate.
